

Use Case ID:	UC 1.2		
Use Case Name:	Edit claim		
Created By:	Kyle Carlstrom	Last Updated By:	
Date Created:	February 8, 2015	Last Revision Date:	
Actors:	Claimant		
Goal:	Claimant edits an existing claim		
Trigger:	Claimant long clicks a claim in the list		
Preconditions:	Claimant knows the claim they want to edit and the fields they will change		
Postconditions:	On success, existing claim is edited to reflect the new information that the user has entered		
Normal Flow:	<ol style="list-style-type: none"> 1. Claimant long clicks a claim in the list 2. System prompts claimant to edit, delete, or cancel 3. Claimant selects edit 4. System shows edit screen 5. Claimant edits the fields that need updating 6. Claimant hits save in the action bar 7. System shows overview screen of the claim 		
Alternative Flows:	<p>2a.</p> <ol style="list-style-type: none"> 1. Claimant hits cancel 2. System does not do anything <p>5a. In step 5 of the normal flow if the Claimant hits back before changing anything</p> <ol style="list-style-type: none"> 1. System does not save edits 2. System returns to previous screen with claim unchanged <p>6a. In step 6 of the normal flow if the Claimant hits back after changing things</p> <ol style="list-style-type: none"> 1. System does save edits 2. System returns to previous screen with claim changed 		
Exceptions:	N/A		
Includes:	N/A		
Notes and Issues:	Not sure about what we want for the back functionality here again specifically 6a
