

Add/ edit claim screen

EditText user clicks to
enter the claim name

Click to enter a
destination and reason
for travel

Click to add a tag to claim

The screenshot shows a mobile application interface for creating or editing a claim. At the top, there is a title bar with the text 'Create/Edit Claim' and a green square button. Below the title bar, there is a text input field labeled 'Claim name'. Underneath this, there are two date pickers, each displaying '12 - 5 - 2014' and a calendar icon. Below the date pickers, there is a section with three input fields: 'Destination', 'Reason for travel', and another 'Destination'. At the bottom, there are three buttons labeled 'Tag 1', 'Tag 2', and 'Tag 3'. Dashed arrows point from the text annotations to the corresponding UI elements: from the 'Claim name' label to the text input field, from the 'Click to enter a destination and reason for travel' label to the 'Destination' input field, from the 'Click to add a tag to claim' label to the 'Tag 1' button, from the 'Save button to save current claim' label to the green square button, from the 'Options menu contains tag manager button...' label to the hamburger menu icon, and from the 'Date pickers...' label to one of the date input fields.

Save button to save
current claim

Options menu contains
tag manager button which
will allow them to manage
tags, and add destination
button which will bring up a
dialog to add a destination

Date pickers, clicking on
each will bring up a date
picker dialog
